The North Star Buffer Tank is designed to provide temporary remote storage for up to 2.2 US tons (2.0 metric tons) of flake ice. Designed for use in mass pour concrete cooling projects, they are typically installed near the point of use so ice is instantly available to fill a weighing hopper (by others) without waiting for ice to be delivered from the storage bin. This is especially beneficial for concrete batching projects where quick response and even ice flow are critical to matching different design mixes. The North Star Buffer Tank is capable of delivering up to 24 US tons (21 metric tons) per hour.

### Feature

**Designed & Manufactured for Reliability & Durability**

- Incorporates independent drives for agitators and discharge screw.
- Water-tight electrical connection on level control to avoid water intrusion through the connection.
- Reinforced agitator paddles.
- Fully insulated hopper.

**Automatic Shut-Off & Protection Devices**

- Paddle-type high-level control stops ice delivery when Buffer Tank is full.
- Hinged cover with sensor to detect excessive ice. Automatically shuts off to prevent damage to the system.

**Saves Money & Time**

- Reduces batch time by having ice always available at mix area.
- Pre-wired electrical motors and junction box. Prevents wiring errors.
- Prevents damage to main delivery system which is not designed for short on/off sequences that are repetitively required.

**Easy to Install**

- Shipped fully assembled with installation instructions.
- Fork lift channels included. Prevents damage during transportation and lifting.
Concrete Cooling Buffer Tanks

**Major System Components**

Frame Assembly  
Hopper Assembly  
Standard CEMA Screw Conveyor Flanged Outlet  
Trough Support Channels  
12” Diameter Heavy-Duty Discharge Screw Conveyor  
Agitator Conveyors

Safety Grate Over Discharge Screw Outlet  
Hinged Trough Cover Assembly  
Junction Box Assembly  
Overfeed Detector Sensor  
Level Control Assembly (120 or 220 V)  
Plastic Hopper Cover

**Dimensions**

2 Ton (1.8 Metric Ton) Buffer Tank

A. 11’-4 3/4” (3473 mm)  
B. 48 1/2” (1232 mm)  
C. 7’-0” (2134 mm)  
D. 7’-0” (2134 mm)  
E. 2’-6” (762 mm)
